Roofing Requirements

All roofing shall comply with Chapter 9 of the International Residential Code, copies available upon request.

With special attention given to the following:

1. Asphalt shingles shall be installed on solid roof sheathing.
2. All valley flashing is to be constructed in accordance with approved manufacturer's instructions.

Asphalt Shingles – a min. 00.016 inch flashing to extend a min. 8" from centerline of valley.

Wood Shingles – a min. 28 gauge flashing to extend a min. 10" from centerline of valley.

3. A new layer of #15 felt will be installed.
4. The ridge cap is installed so the trailing edge must face away from the prevailing winds.
5. An exposed roof will be protected from all adverse weather.
6. No face nailing allowed.
7. All roof construction debris shall be removed from the job site, you will not use the City dumpsters.
8. Where the existing roof or roof covering is water-soaked or has deteriorated to the point that the existing roof or roof covering is not adequate as a base for additional roofing.
9. Where the existing roof covering is wood shake, slate, clay, cement or asbestos-cement tile.
10. Where the existing roof has two or more applications of any type of roof covering.
